EDUCATION

University of California, Los Angeles

Bachelor of Science in Mathematics of Computation

Los Angeles, CA

Aug. 2022 - June 2026

- **Relevant Coursework:** Operating System Principles, Data Structures and Algorithms, Algorithm and Complexities, Software Construction, Machine Learning

EXPERIENCE

Front Desk Attendant

University of California, Los Angeles

December 2022 - Present

Los Angeles, CA

- Delivered excellent **technical support** and **customer service** to residents, faculty, and guests in a fast-paced, 24/7 housing environment.
- **Trained and onboarded** new front desk staff, providing structured documentation and process guidance, improving team efficiency and consistency.
- Collaborated across multiple departments to resolve resident requests, demonstrating strong **communication**, **problem-solving**, and **attention to detail**.

PROJECTS

BruinGrub | *React, MySQL, Express.js, Node.js*

March 2024

- Collaborated with team to create a **full-stack web application** that allows UCLA students to explore dining options, leave reviews, and track calorie intake.
- Utilized **React** for front-end, **Node.js** and **Express.js** for back-end, and **MySQL** for data management.
- Implemented user authentication using **JSON Web Tokens (JWT)** to ensure secure access for dining users and students, enabling distinct functionalities for each user type.
- Enhanced user engagement with a calorie-tracking feature and intuitive user interface.
- Conducted **testing and debugging** to ensure application performance and reliability.

Pi NAS and Cloud Server | *Proxmox, Docker, Nextcloud, MariaDB, Caddy, Cloudflare Tunnel, Tailscale, OMV*

Nov 2025

- Engineered a self-hosted cloud server on a Raspberry Pi 5 using **Proxmox** for virtualization and **Docker Compose** for container orchestration.
- Deployed **Nextcloud** and **MariaDB** containers with persistent volumes and automated SSL via **Caddy** and **Cloudflare Tunnel**.
- Configured **OpenMediaVault (OMV)** for disk pooling and integrated with Docker for scalable network storage and backup automation.
- Implemented secure remote connectivity using **Tailscale VPN**, enabling encrypted peer-to-peer access and remote system administration.

PlanBear.io | *React, Vite, Node.js, Express, PostgreSQL, Sequelize, AWS, Playwright*

Dec 2025

- Designed and built a production-grade full-stack web application that enables students to create, manage, and export multi-year academic degree plans through a responsive drag-and-drop interface using **React**, **Vite**, and **Tailwind CSS**.
- Architected a scalable backend using **Node.js**, **Express**, and **PostgreSQL**, modeling courses, prerequisites, units, and academic constraints with normalized schemas and optimized **Sequelize** queries.
- Implemented secure authentication, API routing, and CORS configuration, enabling reliable frontend-backend communication across development and production environments.
- Deployed and managed the application on **AWS** using **Elastic Beanstalk**, **S3**, and **CloudFront**, configuring custom domains, HTTPS, health checks, and environment-based infrastructure.
- Automated large-scale course data ingestion using **Playwright**, scraping and transforming structured curriculum data for hundreds of UCLA majors into maintainable JSON pipelines for database seeding.

The Miracle Project | *Vite (React), Node.js, Express.js, MySQL, Google Gemini API*

May 2024

- Built an accessibility-focused web platform enabling neurodivergent learners to access classroom material using voice-driven interaction.
- Integrated **Google Gemini API** for speech-to-text and command recognition, improving navigation for diverse user needs.
- Implemented **RESTful APIs** for course content management and built modular **React** components for dynamic front-end workflows.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript (Node.js), SQL, HTML/CSS, R, Bash

Frontend: React, Vite, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, MariaDB, MongoDB

Cloud & DevOps: AWS (Elastic Beanstalk, S3, CloudFront, ACM, ALB), Docker, Git, Linux Server Administration

Testing & Automation: Playwright, Postman

Networking: Cloudflare DNS, HTTPS/TLS, Reverse Proxies, Secure API Communication
